Dear Mr Jonas Pagel and Ms Lena Holzinger,

My name is Khalid and I come from Egypt. I started my master studies joining the Communication and Multimedia Engineering (CME) program at the Friedrich-Alexander University in Erlangen on October 2014 and on June 2017 I finished my master thesis. Currently I am working as a full time research engineer at the Bright Band department in Fraunhofer IIS.

In the future, I am interested in starting my own business back in my home country Egypt. I am relatively young -26 years old- and still have the ability to gain new knowledge in different fields. I found the program "Master in Management" a good fit to my plans due to several reason. First, TUM is one of the best universities in Germany. Second, the program does not require prior study of economics or management, as my whole bachelor and master studies included technical courses only. Third, it is relatively close to my current residence in Erlangen, so attending lectures, exams or submitting projects would be feasible. Finally, all courses are being taught in English, which is really suitable for me as I had my bachelor and master study in English and I work in an international working environment speaking English as well.

Finally, thank you for your time considering my credentials. I am looking forward for your feedback.

Yours faithfully,

Ahmed Khalid
