Ericsson GmbH
Prinzenallee 21
D-40549 Düsseldorf
Germany

Job reference 183347

Dear Sir/Madam,

My name is Khalid and I come from Egypt. I started my master studies on October 2014 and next May, I will finish my master thesis at the Friedrich-Alexander University in Erlangen, and I would like to apply to the position Researcher - Network Architecture and Protocols, which I found on the company webpage.

Ericsson is one of the leading multinational networking and telecommunications equipment company in the world. Working at Ericsson would be a great milestone in my career as an engineer. From the experience point of view, last summer I had an internship at the Bright Band department in Fraunhofer IIS as mentioned in my CV. During the internship, I learned a lot about the LTE protocol stack specially the physical layer. Now, I am doing my master thesis at the same department in the topic of shaping the 5th generation mobile communication. Both experiences gave me the opportunity to know more about the LTE protocol stack, which is one of the important requirement for the position. From the academic point of view, my bachelor and master studies in communication engineering alongside my previous internships are directly related to most of the position requirements as indicated in my CV. I finished my school education in Saudi Arabia, my bachelor studies in Egypt and now I am finalizing my master studies in Germany, which makes me a flexible and adaptive person regarding different work environment.

Finally, thank you for your time considering my credentials. I am looking forward for your feedback.

Best Regards

Ahmed Khalid
