June 14, 2017

Fraunhofer-Institut IIS

Helmholtzpl. 2, 98693 Ilmenau, Germany

Dear Dr.-Ing. Markus Landmann,

My name is Khalid and I come from Egypt. I started my master studies joining the Communication and Multimedia Engineering (CME) program at the Friedrich-Alexander University in Erlangen on Octrober 2014 and on June 2017 I finished my master thesis. Now, I am planning to complete my studies as a Phd student and currently searching for open positions.

From the experience point of view, last summer I had an internship at the Bright Band department in Fraunhofer IIS as mentioned in my CV, where I had the opportunity to work with Open Air Interface (OAI) LTE simulator to implement shorter Transmission Time Interval (TTI) length. During the internship, I learned a lot about the LTE protocol stack specially the physical layer. My Master thesis was in the topic of developing the current LTE standard towards the New Radio requirements by investigating new uplink multiple access schemes. During the Master thesis I learned a lot about system modeling as I have implemented an independent system level simulator using MATLAB object oriented programming in a relatively short time. Both experiences gave me the opportunity to know more about the LTE protocol stack (physical layer and MAC layer).

I finished my school education in Saudi Arabia, my bachelor studies in Egypt and now I am done with my master studies in Germany, which makes me a flexible and adaptive person regarding different work environments and traveling. I am still young (25 years old), ambition and I learn pretty fast.

Currently I am working as a full time diplom Hiwi employee at the Bright Band department in Fraunhofer IIS. If you have new/current projects coming up with new open positions, I would like you to consider my application as a Phd student.

Finally, thank you for your time considering my credentials. I am looking forward for your feedback.

Yours faithfully,

Ahmed Khalid
